The Joint Nature Conservation Committee is the body constituted by the Environmental Protection Act 1990 to be responsible for research and advice on nature conservation at both UK and international levels. It is a committee of the Countryside Council for Wales, English Nature and Scottish Natural Heritage, together with independent members and with representatives from the Countryside Commission and Northern Ireland. It is supported by specialist staff.

Prepared under contract from the Joint Nature Conservation Committee by the **World Conservation Monitoring Centre**. The World Conservation Monitoring Centre, based in Cambridge, UK, is a joint venture between three partners in the World Conservation Strategy and its successor Caring for the Earth: IUCN – The World Conservation Union, UNEP – United Nations Environment Programme, and WWF – World Wide Fund for Nature. The Centre provides information services on the conservation and sustainable use of species and ecosystems and supports others in the development of their own information systems.

The designations of geographical entities in this report, and the presentation of the material, do not imply the expression of any opinion whatsoever on the part of JNCC or WCMC concerning the legal status of any country, territory, or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Acknowledgements

This checklist was compiled by the World Conservation Monitoring Centre under contract F76-01-214 from the Joint Nature Conservation Committee. The document was compiled by Brian Groombridge and Tim Inskipp and produced by Julie Reay and Gillian Warltier.

We are grateful to E.N. Arnold for advice and access to information resources in the Amphibian and Reptile section at The Natural History Museum (London), and thank Stephen Edwards, Chairman CITES Nomenclature Committee, for assistance.

Martin Sneary is thanked for developing the database from which this checklist has been generated.

Vin Fleming and Alison Littlewood of the JNCC CITES Unit are thanked for providing advice and guidance throughout.

Introduction

In April 1991, the Nature Conservancy Council for England (English Nature), Countryside Council for Wales and Scottish Natural Heritage acting together through the Joint Nature Conservation Committee were appointed by the Secretary of State for the Environment as the United Kingdom's Scientific Authority for Animals under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES regulates international trade in wild animals and plants and in products derived from them, to help to ensure their conservation on a world-wide scale.

The intention of this work is to provide a combined list of amphibian and reptile species included in the Appendices to CITES, the Annexes of the European Community (EC) Regulation 338/97, and to list their IUCN (World Conservation Union) conservation status category.

This revised edition incorporates additions and amendments to the CITES appendices up to and including those made at the 10th Meeting of the Conference of the Parties in Zimbabwe in June 1997 (effective from 18 September 1997). The IUCN status categories given here are those current at the time of preparation, as represented in the *1996 IUCN Red List of Threatened Animals* (IUCN, 1996).

For background material on the rationale of the IUCN threat categories, readers are referred to IUCN (1996), for background on the workings of CITES, recommended works are Favre (1989) and Wijnstekers (1992). For information by country on the diversity and status of amphibians, reptiles and other taxonomic groups, and for a general review of biodiversity, readers are referred to WCMC (1992) and WCMC (1994).

In a publication of this nature, it is inevitable that users will discover entries that need correcting or updating. The publishers would be grateful if their attention could be drawn to these entries and the World Conservation Monitoring Centre would be grateful to receive details of such changes so that they can be incorporated in the database from which this publication is derived.

Explanatory notes

Each species is typically represented by a block of text including scientific name (with alternatives), common names in the three official CITES languages (where available), geographic range, CITES Appendix, EC Regulation 338/97 Annex, and IUCN Red List category. Where a species has component populations or formal subspecies which are treated differently by CITES, the species entry is subdivided appropriately.

Scientific names

Nomenclature follows that used in the CITES Appendices for the forms appearing therein.

For each taxon listed, the scientific name and authority is given first, with alternative names given in parentheses on the following line. In the majority of cases these alternatives are the most frequent synonyms in current use. In a few cases, these are recently proposed taxonomic changes not yet in common use, and in others the scientific name in parentheses is that accepted by taxonomists, but not the name used in the CITES Appendices.

The sequence of families within orders also conforms to the CITES Appendices (thus the amphibian families are in alphabetical order while the reptile families follow a conventional systematic order). The genera and species are in alphabetical order within each family. The primary taxonomic source followed for most of the groups covered is given below; the numerous later changes and additions to these checklists are referenced separately in the relevant species entries.

Amphibians: (Frost, 1985 and Duellman, 1993) adopted by the CITES parties as the standard reference to amphibian nomenclature.
Testudines: Iverson (second edition, 1992).
Crocodylia and Rhynchocephalia: King and Burke (1989).
Gekkonidae (Wermuth, 1965; Kluge, 1991).
Agamidae (Wermuth, 1967).
Chamaeleonidae (Mertens, 1966; Klaver and Böhme, 1997).
Iguanidae (several sources, see individual entries).
Cordylidae (Wermuth, 1968; Branch, 1988).
Teiidae (several sources, notably Peters and Donoso-Barros, 1970).
Helodermatidae and Varanidae (Mertens, 1963).
Boidae (Stimson, 1969; Sheplan and Schwartz, 1974; Underwood and Stimson, 1990).
Colubridae (several sources, see individual entries).
Elapidae and Viperidae (Klemmer, 1963; Leviton, 1968).

Common names

Common names and trade names appear below the scientific names; few of the listed taxa have regularly or universally used common names. In some cases, identical trade names appear to be used for different taxa.

Geographical range

After the scientific and common names of each taxon, the geographical range is given in terms of political units, listed in alphabetical order. In several cases, particularly where islands are concerned, further distribution details are given thus 'Indonesia: Sumatra'. When the name of a country is given as part of the range of a certain species, that species may not occur throughout the country and may even be of only peripheral occurrence.

A question mark '?' in parentheses has been used following a country to indicate that there is some uncertainty in the status of the species in that country.

A country where the species is known to be extinct is denoted by '(ex)', or by '(ex?)' where there is still a small possibility that the species survives.

'[int]' denotes a range state where the species has been introduced. '[re-int]' denotes a range state where the species has been re-introduced.

Other information

The three columns headed 'CITES', 'EC Reg.' and 'RL', list the following information for each taxon.

CITES

I, II or III, referring to the CITES Appendix on which the taxon is listed. The letters (eq) after an Appendix II entry denote that the population is on Appendix II subject to an export quota. The letters following Appendix III entries denote the country whose government placed the taxon in this category, as follows: GH, Ghana; HN, Honduras; IN, India.

EC Regulation

The letters (A-D) in this column refer to the Annex of EC Regulation 338/97 in which the taxon is listed.

RL

Threat categories follow those given in the *1996 IUCN Red List* and are as follows:

EX	Extinct
EW	Extinct in the Wild
CR	Critically Endangered
EN	Endangered
VU	Vulnerable
LR	Lower Risk
LR/cd	Lower Risk/Conservation dependent
LR/nt	Lower Risk/Near threatened
LR/lc	Lower Risk/Least concern
DD	Data Deficient
NE	Not Evaluated

No Red List category is given in those few instances where a particular subspecies appears in the IUCN Red List but not the species as a whole

Names of countries and dependent territories

This checklist has been made as compact as possible by listing names of countries and dependent territories in the shorter forms given by United Nations (1993).

Countries for which shorter forms of names are used and their shortened form:

Brunei Darussalam	Brunei
Democratic People's Republic of Korea	North Korea
Falkland Islands and Dependencies	Falkland Islands
Islamic Republic of Iran	Iran
Lao People's Democratic Republic	Laos
Libyan Arab Jamahiriya	Libya
Northern Mariana Islands	Northern Marianas
Republic of Korea	South Korea
Saint Vincent and the Grenadines	Saint Vincent
Syrian Arab Republic	Syria
United Republic of Tanzania	Tanzania
United Kingdom of Great Britain and Northern Ireland	United Kingdom
United States of America	USA

In the text, parent countries of island groups or dependent territories are omitted. These are listed below:

American Samoa, USA
Anguilla, United Kingdom
Aruba, Netherlands
Ascension Islands, United Kingdom
Azores, Portugal
Bermuda, United Kingdom
Bouvet Island, Norway
British Antarctic Territory, United Kingdom
British Indian Ocean Territory, United Kingdom
British Virgin Islands, United Kingdom
Canary Islands, Spain
Canton and Enderbury Islands, Kiribati
Cayman Islands, United Kingdom
Channel Islands, United Kingdom
Christmas Island, Australia
Cocos (Keeling) Islands, Australia
Cook Islands, New Zealand
Falkland Islands, United Kingdom
Faeroe Islands, Denmark
Federated States of Micronesia, USA
French Guiana, France
French Polynesia, France
French Southern and Antarctic Territories, France
Gibraltar, United Kingdom
Greenland, Denmark
Guadeloupe, France
Guam, USA
Guernsey, United Kingdom
Hawaiian Islands, USA
Heard and Macdonald Islands, Australia
Isle of Man, United Kingdom
Jersey, United Kingdom
Johnston Atoll, USA
Macao, Portugal
Macquarie Island, Australia
Madeira, Portugal
Marshall Islands, USA
Martinique, France
Mayotte, France
Montserrat, United Kingdom
Netherlands Antilles, Netherlands
New Caledonia, France
Niue, New Zealand
Norfolk Island, Australia
Northern Marianas, USA
Palau, USA
Panama Canal Zone, USA
Pitcairn Islands, United Kingdom
Puerto Rico, USA
Queen Maud Land, Norway
Réunion, France
Saint Helena, United Kingdom
Saint Pierre and Miquelon, France
Saint Vincent, United Kingdom
South Orkney Islands, United Kingdom
South Sandwich Islands, United Kingdom
South Georgia, United Kingdom
South Shetland Islands, United Kingdom
Svalbard and Jan Mayen Islands, Norway
Tokelau, New Zealand
Tristan da Cunha Islands, United Kingdom
Turks and Caicos Islands, United Kingdom
Virgin Islands of the United States, USA
Wallis and Futuna, France
